

## PROJECT ENGINEER

Chicago Tube and Iron Company is a leader in the metals distribution and fabrication industry. We are an established company with an impressive record of profitability and growth. At Chicago Tube and Iron, we like to think of ourselves as a company that is big enough to offer financial strength and stability, but yet small enough to quickly change direction when our customers' needs require it. Our sales force and operations personnel share their expertise to come up with the best possible solutions for our customers. Want to know more? Visit us at [www.chicagotube.com](http://www.chicagotube.com).

We offer a competitive salary commensurate with experience, and a comprehensive benefits package that includes medical, dental, and vision insurance, as well as supplemental life and disability benefits. We also offer a 401(k) Plan.

We are seeking a **Project Engineer** at our **Engineered Products Division in Romeoville, IL**.

**Job Type:** Full-time

We are seeking a successful and highly motivated person to join our Engineered Products Team. In this role the Project Engineer will work to expand our value added business. Chicago Tube and Iron needs to penetrate new customers while expanding products of existing customers. Specifically this person will develop quotes and then facilitate the new products implementation process within Chicago Tube and Iron. The candidate will interact with various branches and customer personnel (purchasing, engineering, operations) to provide products (parts, weldments and assemblies) that bring value to both our customers and CTI.

### **Responsibilities include:**

- Reviews blueprints, plans, and other customer documents and verbal descriptions to develop and prepare cost estimates for parts, weldments and assemblies.
- Grow opportunities within existing customer base
- Identify and penetrate new customer & opportunities
- Project Engineer establishes, develops and maintains business relationships with current customers and prospective customers to generate new business for the organization's value added fabrication products/services.
- Develops and refines sales/manufacturing methods, processes, costs, and strategy to maximize company profit.
- Actively participates in the attainment of company goals and objectives
- Recommends new ideas, methods, equipment and procedures to enhance operations and expand sales.
- Manufacturing experience in a variety of industrial environments and familiarity with multiple fabrication and assembly processes a big plus.
- Lean or process improvement practical application experience desirable
- Clearly communicate customer needs to internal stakeholders

- Provides quotations and enters orders for products or services
- Strong interpersonal and communication skills, both orally and in writing, and the ability to work effectively with a wide range of coworkers in a diverse community, fostering a cooperative work environment.
- Strong problem solving and analysis skills.
- Provides technical training, as required, to employees and to clients.
- Must be able to travel out-of-state.

## **EDUCATION and/or EXPERIENCE**

College degree is required plus minimum of three years' experience in manufacturing or technical sales. Understanding of lean manufacturing and various fabrication processes such as tube laser cutting, bending, welding and assembly.
