

ANNOUNCEMENT

Chicago Tube and Iron is pleased to welcome Lori Lester as the Quality Manager for Engineered Products-Locust Division.

Lori will graduate from the University of South Carolina in December 2017; she is also an AWS-CWI, and has extensive experience as a QA/QC Manager for both fabrication and field service companies within the boiler industry. In addition, she has been the safety coordinator for her previous employers.

Lori has a strong ISO background along with a Six Sigma Black Belt. Her experience with lean manufacturing concepts and root cause analysis will be instrumental as we continue to transition the Locust facility. Also, she has previously served in the Air Force Reserves; we thank her for her service.

Please join us in welcoming Lori to Chicago Tube and Iron!
